Introduction

What does it do?

This extension updates the content that gets indexed using indexedsearch_ttnews_crawler.

By installing this extension, the content of the tt_news entry will be rendered as it is on the frontend and then pushed back to indexedsearch.

It enables you to have some content, saved in the row "bodytext" of your news-item and in addition have something that's added to the content by a hook in tt_news.

One example for this usage is the extension rgnewsce.

Screenshots

No screenshots necessary since it doesn't add anything visually.

Users manual

There's nothing this extension adds where a user could interact.

Administration

Just don't forget to add the column "bodytext" to the list of fields in your Indexer Configuration. This extension replaces the content of this column by it's on FE displayed text.

Configuration

No configuration necessary.

Tutorial

No steps required.

Known problems

No known problems.

To-Do list

Please drop me a mail if you're missing a feature or need a closer implementation to a plugin of your choice that also adds content to tt_news.

ChangeLog

Version:	Changes:
2.1.7	Fixed compatibility to extensions using custom image markers (like *perfectlightbox*)
2.1.6	Prevent all kind of image-rendering (better work-around introduced in 2.1.3)
2.1.5	Now compatible with *newsreadedcount* and raised compatibility to TYPO3 6.1.x (no code changes)
2.1.4	Raised compatibility to TYPO3 v4.5.0-6.0.x
2.1.3	Workaround for FAL in TYPO3 CMS v6.0 – this extension should not render images. Images are now removed from the *tt_news* entry before parsing. Cache of *tt_news* needed to be disabled too.
2.1.2	Fixed issue because the files for *rgnewsce* were included at an incompatible position because of what things like the preview-image didn't work when the cache was enabled.
2.1.1	Cleaned up the extension ...
2.1.0	Updated documentation
2.0.0	Added documentation and an icon
1.0.0	Wrote the code of the extension.
